

# Facial Profiling Personality Report

Age Range: {'High': 46, 'Low': 38}

Gender: {'Confidence': 99.13670349121094, 'Value': 'Male'}

Smile: {'Confidence': 96.14234161376953, 'Value': False}

## Confidence:

Personality Profile Based on Facial Attributes

## DecisionMaking:

1. Confidence & Leadership - Indicators: - Beard and Mustache: The presence of both a beard and mustache, combined with high confidence levels for these attributes (Beard: 99.95%, Mustache: 94.58%), suggests a deliberate and mature appearance. It reflects a preference for projecting authority and self-assurance. - Pose and Eye Direction: A slight downward pitch of the face (+1.08°) and a subtle negative yaw (-6.76°) indicate a reserved but composed demeanor. The directed gaze (Yaw: +8.93°) suggests attentiveness and focus, traits often linked to confident leaders. - Calm Emotion: The primary emotional state detected is Calm (80.87%), which is a strong indicator of emotional control—a key trait of effective leadership.

## EmotionalStability:

- Assessment: This individual likely exhibits quiet confidence and prefers leading through composed, measured actions rather than overt displays of dominance. They are likely to command respect through their presence and ability to remain steady under pressure.

## Sociability:

---

## Strengths:

2. Decision-Making Style - Indicators: - Facial Expression: A lack of a smile (Smile: False, Confidence: 96.14%) combined with a closed mouth (MouthOpen: False, Confidence: 97.59%) suggests a thoughtful and deliberate approach to decision-making. This individual is likely to evaluate options carefully before taking action. - Calm Emotional State: The high confidence in "Calm" emotion indicates a logical and rational decision-making process, even in challenging situations. - Eyeglasses and Sunglasses Absent: The absence of eyewear (Eyeglasses: False, Confidence: 99.92%; Sunglasses: False, Confidence: 99.99%) reflects an unfiltered and straightforward perspective—this individual likely values clarity and transparency in their decision-making.
